* Comment. The report continues previous information. 50X1-HUM

On some days the volume of traffic reported as passing through Frankfurt/Oder is unusually high; on the other days it is on a level observed in the previous week. Traffic via Forst continues to rise slightly. The same applies to the traffic through Bad Schandau, with the exception of some days when the traffic observed was unusually heavy. Traffic carried by the railroad ferry operating between Harnemuende and Gedser has slightly decreased, probably because of bad weather on the Baltic Sea.
